

Dr. Warith Harchaoui

Warith Harchaoui is a scientist and enthusiast in artificial intelligence who has built his career between academic research and business pragmatism. In 2008, he obtained a Master's degree in Applied Mathematics from the École Normale Supérieure de Cachan (MVA). After several experiences in the field of Computer Vision (Philips Healthcare, Aldebaran Robotics), he decided to pursue his research endeavor at the École Normale

Supérieure de Paris at the Willow laboratory (INRIA / CNRS) with a Microsoft Research funding. Later, he builds a professional career in *Data Science* at Oscaro.com (world leader in e-commerce of car parts) from 2014 to 2020. While keeping his operational responsibilities, he joined the MAP5 laboratory of the University of Paris to accomplish his Ph.D. in Applied Mathematics from 2016 to 2020. Today, his work in image, sound, video and text processing encouraged him to embrace a new dream: bringing his expertise from artificial intelligence into the real world as the founder of his own company.
